6. Risk Disclosure

6.1 Trading on margins carries a high level of risk to your capital, and you may lose more than your initial deposit. We are advising you to read the full risk warning before opening an account with SFS. Margined trades are trades based on the price movement of Contract for Differences (CFDs) underlying financial product or asset.

6.2 They are settled based on the respective difference between the opening price and closing price of the trade. Foreign exchange (forex, FX) and Contracts for Difference (CFDs) on Currencies, Commodities, Indices, or Equities are all margin-traded products and thus inherently carry a high-risk level that is not suitable for all investors.

6.3 Prior to opening an account with SFS, you should carefully consider your objectives, financial situation, relevant experience and understanding with regards to trading.

6.4 You should ensure that you will be able to manage, understand the risks involved, and sustain any losses.

6.5 You should only trade with capital that you can afford to lose.

6.6 SFS recommends seeking advice from a separate/independent financial advisor. You should note that Margin trading is based on leverage that allows you to execute large trades by only investing a small amount of money as a margin. If the price moves in your favor, you can significantly increase your profits. You should understand that even a very small movement in the non-desirable price may lead to substantial losses. Please note that in this case, you may be required to deposit additional margin immediately to keep your positions open.

6.7 Note that you are liable for any losses that may occur in case of closed positions. Have in mind that not all trades can be opened or closed 24 hours a day. Your orders/positions are based on our prices and not those on any exchange.

6.8 Depending on the market, our prices will usually be based on an exchange price but can fluctuate away from the underlying fees due to various reasons.

6.9 There are risks associated with online trading systems, including, but not limited to, software and hardware failure, and internet disconnection. SFS does not control signal power, its reception or routing via the internet, the configuration of your equipment or reliability of its connection, and cannot be responsible for communication failures, distortions or delays when trading via the internet.

SFS has taken reasonable measures to ensure the accuracy of the information on its website. However, we cannot guarantee its accuracy.

7.4 When you click the submit button to enter an order through our Online Platform (or give us an order by any other means we may agree) we will be under no obligation to accept it or, if accepted, under no obligation to execute it. Unexecuted orders may be cancelled at our discretion. Once an order has been entered into our Online Platform it may not be altered or cancelled by you.

7.5 We will endeavor to advise you promptly if circumstances arise where we may be unable to accept or execute your orders, provided however that we are under no obligation to provide you with our reasons for not acting on your orders and provided further that we shall not be liable to you in any way if we refuse to follow your orders.

7.7 We reserve the right to change the margin requirements at any time and any change may become effective immediately. We may inform you of this by email, via the electronic trading platform, from a recorded line and/or by posting notice of the change on our website. It is your responsibility to always know the current margin requirement applicable to your account and your open positions.

7.8 Due to limitations of an Online platform, where it is possible for a market to go negative, we reserve the right to close any open positions and/or settle the market at a predetermined level in the positive, or at the best attainable price, which could also be negative.

Any orders attempted via electronic or automated methods may be rejected or voided at the Company's sole discretion.

b. The Client acknowledges and accepts that the Company does not permit algorithmic, high-frequency, or automated trading strategies under any circumstances. - If, at any time, the pre-agreed credit limit assigned to you is no longer sufficient to cover the negative mark to market value of any or all open positions that you have with us.

8.2 We shall have the right, in our absolute discretion, to determine the mark to market value of a position or instrument from time to time. In addition to other remedies available to us, if you fail to pay an amount when due under this Agreement, we have the right to close (by either buying or selling) any or all of your open positions.

8.3 We are not obliged to contact you before we take the relevant action. If, however we do so, the margin call may be made by email, via the electronic trading platform, telephone call, post or text message. The margin call will be deemed to have been received if we have left a message requesting you to contact us, or if we have been unable to leave a message but made reasonable endeavours to do so.
